Work Experience

Automotive Technician

Lexus of Towson -- Towson, Maryland
October 2017 -- January 2022

Description:

- Diagnosed and resolved complex electro-mechanical faults utilizing computerized diagnostic tools, proprietary software, and live data stream analysis.
- Interpreted intricate wiring schematics and manufacturer documentation to isolate electrical shorts, module failures, and network communication errors (CAN bus).
- Served as a licensed Maryland State Inspector, strictly adhering to regulatory compliance and performing rigorous quality assurance testing.

- Translated highly technical diagnostic findings into clear, actionable summaries for service advisors and non-technical end-users.
- Completed specialized, manufacturer-led training in advanced electrical and climate control systems, demonstrating a commitment to continuous technical learning.

Automotive Technician

Antwerpen Toyota -- Clarksville, Maryland
2013 -- October 2017

Description:

- Executed systematic troubleshooting methodologies to identify root causes of system malfunctions, reducing repeat failures and improving operational efficiency.
- Performed precision repairs and preventative maintenance on thousands of vehicles while strictly adhering to documented standard operating procedures (SOPs).
- Managed multiple concurrent repair tickets in a fast-paced, deadline-driven environment without compromising safety or accuracy.

Manager

Ledo Pizza -- Severn, Maryland
2012 -- 2014

Description:

- I worked part-time on Sundays only as a manager for Ledo Pizza in Severn, MD.
- I made sure the restaurant operated smoothly, and handled the money at closing time.
- I took the job to make some extra money and help the owner of the restaurant who I have known since I was a child.

Apprentice & Service Technician

Antwerpen Toyota & Jim Coleman Honda -- Clarksville, Maryland
2011 -- 2012

Description:

- Completed a rigorous apprenticeship under two Master Technicians, rapidly acquiring advanced diagnostic methodologies and technical problem-solving skills.
- Performed routine preventative maintenance and hardware servicing with a focus on accuracy, speed, and customer safety.

- Developed a strong foundation in mechanical and electrical systems, forming the basis for a decade-long career in advanced technical diagnostics.
- The typical work included:
  - Oil changes
  - Tire rotations
  - Air filter replacements
  - Wiper blade inserts
  - Fluid exchanges

Food Server

Bob Evans Restaurant -- Linthicum Heights, Maryland
2009 -- 2012

Description:

- I worked part-time as a food server starting while I was in high school in the evenings, and for a couple years after I graduated while I was receiving training to become an automotive technician.

Network Administrator's Assistant

Chapelgate Christian Academy -- Marriottsville, Maryland
September 2009 -- September 2010

Description:

- During my senior year of high school I only had classes for the first half of the day.
- For the last half of the school day and during the Summer after I graduated I worked as an assistant for the school's Network Administrator, Patricia Cully.
- This job involved performing repairs to computers, servers, and other electrical equipment. As well as learning how to configure network equipment, Active Directory, and other Windows Server functions.

Education

Information Technology

Community College of Baltimore County -- Owings Mills, Maryland
2022 -- 2023

Information Technology

Howard Community College -- Columbia, Maryland
2010 -- 2012

High School

Chapelgate Christian Academy -- Marriottsville, Maryland
2006 -- 2010

🛜 Home Lab & Infrastructure Projects

Network Architecture and Server Administration

- Architected and deployed a self-hosted infrastructure environment utilizing a ZimaOS NAS, a Raspberry Pi 4B server, and a Debian Virtual Machine to securely manage containerized services and network storage.
- Engineered a robust local network by implementing a clustered Technitium DNS server with two nodes, successfully migrating from Pi-hole to enhance network-wide resolution and security with DNS-over-TLS.
- Deployed and configured a Caddy reverse proxy on a Raspberry Pi Zero 2 W to manage SSL/TLS certificates and securely route traffic to internal network services.
- Engineered secure, encrypted remote access to internal network infrastructure by deploying and configuring a WireGuard VPN tunnel.
- Utilized Cloudflare Tunnels *(Cloudflared)* to securely expose self-hosted applications—such as Immich and Uptime Kuma—to the public internet, ensuring zero-trust inbound access without opening external firewall ports.

Linux Administration & Version Control

- Administered a daily-driver Fedora Linux workstation running the KDE Plasma desktop environment, demonstrating deep, hands-on familiarity with the Linux file system, package management, and shell environments.
- Implemented strict configuration management and version control utilizing Git to systematically back up `~/.config` directories to a private GitHub repository, ensuring rapid disaster recovery and environment consistency.

Application Deployment & Data Migration

- Deploy, maintain, and troubleshoot self-hosted, open-source applications using Docker and Podman, including services like Homebox for inventory management.
- Executed a comprehensive data migration from cloud platforms *(Google Photos)* to a locally hosted Immich server, prioritizing data privacy, system integration, and secure access.

IoT & Hardware Integration

- Currently engineering a privacy-focused smart home ecosystem by migrating distributed IoT devices into a centralized Home Assistant platform on an isolated VLAN.
- Perform advanced hardware troubleshooting, calibration, and component modifications on 3D printing equipment *(Creality K1C)*, integrating custom bed-leveling kits and maintaining operational uptime.

🛠 Skills

- Python
- HTML
- CSS
- Markdown
- YAML
- JSON
- TOML
- Mermaid.js
- GNU / Linux shell scripting *(Bash, Zsh)*
- Docker / Podman containerized application management and deployment
- Internet Protocol suite *(TCP/IP)*
- Firewall / Router configuration
- Computer hardware troubleshooting
- Computer hardware installation
- Microsoft Office
- Microsoft Windows
- Microsoft Powershell
- Automotive Electrical Systems
- Engine and transmission mechanical troubleshooting, assembly, and disassembly
