Work Experience

Automotive Technician

Lexus of Towson — Towson, Maryland
October 2017 — January 2022

Description:

- Diagnosed and resolved complex electro-mechanical faults utilizing computerized diagnostic tools, proprietary software, and live data stream analysis.
- Interpreted intricate wiring schematics and manufacturer documentation to isolate electrical shorts, module failures, and network communication errors (CAN bus).
- Served as a licensed Maryland State Inspector, strictly adhering to regulatory compliance and performing rigorous quality assurance testing.
- Translated highly technical diagnostic findings into clear, actionable summaries for service advisors and non-technical end-users.
- Completed specialized, manufacturer-led training in advanced electrical and climate control systems, demonstrating a commitment to continuous technical learning.

Automotive Technician

Antwerpen Toyota — Clarksville, Maryland
2013 — October 2017

Description:

- Executed systematic troubleshooting methodologies to identify root causes of system malfunctions, reducing repeat failures and improving operational efficiency.
- Performed precision repairs and preventative maintenance on thousands of vehicles while strictly adhering to documented standard operating procedures (SOPs).
- Managed multiple concurrent repair tickets in a fast-paced, deadline-driven environment without compromising safety or accuracy.

Manager

Ledo Pizza — Severn, Maryland
2012 — 2014

Description:

- I worked part-time on Sundays only as a manager for Ledo Pizza in Severn, MD.
- I made sure the restaurant operated smoothly, and handled the money at closing time.
- I took the job to make some extra money and help the owner of the restaurant who I have known since I was a child.

Apprentice & Service Technician

Antwerpen Toyota & Jim Coleman Honda — Clarksville, Maryland
2011 — 2012

Description:

- Completed a rigorous apprenticeship under two Master Technicians, rapidly acquiring advanced diagnostic methodologies and technical problem-solving skills.
- Performed routine preventative maintenance and hardware servicing with a focus on accuracy, speed, and customer safety.
- Developed a strong foundation in mechanical and electrical systems, forming the basis for a decade-long career in advanced technical diagnostics.
- The typical work included:
 - Oil changes
 - Tire rotations
 - Air filter replacements
 - Wiper blade inserts
 - Fluid exchanges

Food Server

Bob Evans Restaurant — Linthicum Heights, Maryland
2009 — 2012

Description:

- I worked part-time as a food server starting while I was in high school in the evenings, and for a couple years after I graduated while I was receiving training to become an automotive technician.

Network Administrator's Assistant

Chapelgate Christian Academy — Marriottsville, Maryland
September 2009 — September 2010

Description:

- During my senior year of high school I only had classes for the first half of the day.
 - For the last half of the school day and during the Summer after I graduated I worked as an assistant for the school's Network Administrator, [Patricia Cully](#).
 - This job involved performing repairs to computers, servers, and other electrical equipment. As well as learning how to configure network equipment, Active Directory, and other Windows Server functions.
-

Education

Information Technology

Community College of Baltimore County — Owings Mills, Maryland
2022 — 2023

Information Technology

Howard Community College — Columbia, Maryland
2010 — 2012

High School

Chapelgate Christian Academy — Marriottsville, Maryland
2006 — 2010

Home Lab & Infrastructure Projects

Network Architecture and Server Administration

- Architected and deployed a self-hosted infrastructure environment utilizing a ZimaOS NAS, a Raspberry Pi 4B server, and a Debian Virtual Machine to securely manage containerized services and

network storage.

- Engineered a robust local network by implementing a clustered Technitium DNS server with two nodes, successfully migrating from Pi-hole to enhance network-wide resolution and security with DNS-over-TLS.
- Deployed and configured a Caddy reverse proxy on a Raspberry Pi Zero 2 W to manage SSL/TLS certificates and securely route traffic to internal network services.
- Engineered secure, encrypted remote access to internal network infrastructure by deploying and configuring a WireGuard VPN tunnel.
- Utilized Cloudflare Tunnels (*Cloudflared*) to securely expose self-hosted applications—such as Immich and Uptime Kuma—to the public internet, ensuring zero-trust inbound access without opening external firewall ports.

Linux Administration & Version Control

- Administered a daily-driver Fedora Linux workstation running the KDE Plasma desktop environment, demonstrating deep, hands-on familiarity with the Linux file system, package management, and shell environments.
- Implemented strict configuration management and version control utilizing Git to systematically back up `~/.config` directories to a private GitHub repository, ensuring rapid disaster recovery and environment consistency.

Application Deployment & Data Migration

- Deploy, maintain, and troubleshoot self-hosted, open-source applications using Docker and Podman, including services like Homebox for inventory management.
- Executed a comprehensive data migration from cloud platforms (*Google Photos*) to a locally hosted Immich server, prioritizing data privacy, system integration, and secure access.

IoT & Hardware Integration

- Currently engineering a privacy-focused smart home ecosystem by migrating distributed IoT devices into a centralized Home Assistant platform on an isolated VLAN.
- Perform advanced hardware troubleshooting, calibration, and component modifications on 3D printing equipment (*Creality K1C*), integrating custom bed-leveling kits and maintaining operational uptime.

Skills

- Python
- HTML
- CSS
- Markdown
- YAML

- JSON
 - TOML
 - Mermaid.js
 - GNU / Linux shell scripting (*Bash, Zsh*)
 - Docker / Podman containerized application management and deployment
 - Internet Protocol suite (*TCP/IP*)
 - Firewall / Router configuration
 - Computer hardware troubleshooting
 - Computer hardware installation
 - Microsoft Office
 - Microsoft Windows
 - Microsoft Powershell
 - Automotive Electrical Systems
 - Engine and transmission mechanical troubleshooting, assembly, and disassembly
-
